CROSSOVER
10g Self Loading stretcher

Spencer Crossover is a self-loading stretcher with adjustable heights for patient transport. It is a compact and light stretcher, usable in rescue operations on streets and rescue vehicles. The legs fold away independently, activating the dedicated commands during the unloading procedure, they open automatically. The loading carriage can be folded to make movement in confined spaces easier. Crossover is characterized by higher loading capacity than a standard Cross. 10G certified when used with the fastener Spencer S-Max
