Compact Flowmeter BS

With humidifier

Image shows the UNI version

System including humidifier and a flowmeter with calibrated orifices with a male probe intended to be connected to gas-specific sockets compliant with BS standards. The socket shall be installed within a distribution system for medical gases.

Specific Characteristics

- Multiple selection of the delivered oxygen
- Selection of the flow visible both on the front and upper side to make reading easy in different viewing conditions
- The humidifier helps to reduce the dryness of mucosas during the administration of oxygen
- Safety and rapidity of the connection and disconnection procedures, thanks to the gas-specific probe
- Humidifier with hose output for the connection of devices used for oxygen administration
- Color coded probe for immediate identification

Compliant with

- UNI EN 15002
- UNI EN ISO 8185
